Freestanding Double-sided Backlit Display

AURA™ is a great backlit solution for any environment.

Stable and stylish free-standing aluminum extrusion frame fits in perfectly with any existing display. Add one or multiple AURA™ standing lightboxes to 10x10, 10x20 or island trade show spaces. The AURA™ is perfect for permanent installations and portable enough for easy transport in trade show applications. The round sides of this vertical frame have a far more finished and purposeful shape than typical exposed frames. Universal appeal of the frame is eclipsed by the stunning double-sided backlit fabric graphics. The brilliance of Trifab dye-sublimated graphics is second to none. The deep saturation and expanded pigment range of this process and material combo brings your image to life. Backlighting from the AURA™ lightbox brings out the brilliant color and fine detail of your high-quality images. Photos, text and colorful design elements all benefit from dye-sublimated backlit Trifab graphics. The optional rigid graphic header can be printed with a full image on both sides. The header makes a great topper that enhances your message. Create remarkable displays within 10', 20', inlines or larger island displays.

Easy change-out of the fabric, so easy that you could have a new message every day of the show! SEG (silicone edge graphics) means message updates ship to your destination in an envelope.

AURA™ sets-up in minutes and requires no special installation crews. Shipping, set-up and tear down in trade show situations will leave you asking how you ever found the time to work with outdated cumbersome, heavy displays systems. More than just a lightbox - AURA truly is a full functioning trade show display!

#### Benefits

- Super fast, super easy graphic change-out
- Lower shipping cost
- Permanent or portable
- No labor cost; quick set-up/breakdown
- Style is universally appealing - goes with anything
- Backwall or two way traffic message carrier
- Add to any existing Tradeshow display

#### Features

- Lightweight aluminum frame
- Backlit SEG dye-sublimated fabric graphic provide amazing image "pop"
- Rigid double-sided header further enhances message
- Stylish rounded vertical sides
- Double-sided - capture attention of two-way traffic
- Internal lighting system
- Three stock sizes; custom sizes available
