

# Xpressions®CONNEX™ LED Lightbox Set up

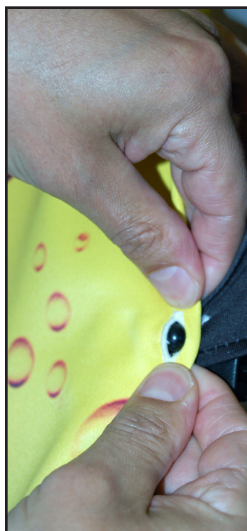

1. Set up all 1x3 Xpressions® SNAP!™ frames and connect them together with a CONNEX™ shelf top and bottom.

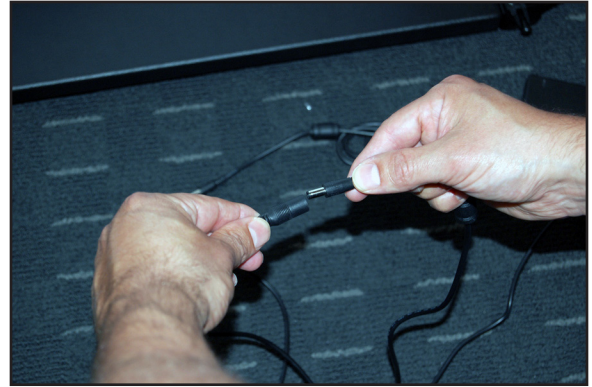

2. Attach the LED lightbox to the front of the display by wrapping the short elastic bands around the hubs covering the quadrants between the CONNEX™ shelves.

Do the same on the back of the display by wrapping the longer elastic bands around the backside hubs.

3. Attach the backlit graphic skin over the front of the lightbox by attaching to the front hubs.

4. At the back of the display connect the two cords from the bottom of the lightbox into the power supply cords. Then plug into your electric source and turn on.

Backview of CONNEX™ display with 1x3 lightbox attached.

View of one lightbox attached to the frame with the backlit skin pulled back to show the lit lightbox.
