

six easy steps

set-up instructions

4

Slip the grommets at the top of the graphic onto the hooks at the top of each arm. Adjust the main pole height to raise the graphic – but do not extend it fully.

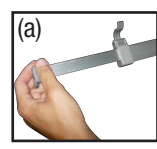

1

Remove the base from the bag and fill with water.

5

Expand the bar that's attached to the base, by flipping the clip open (a) and pulling the bar apart to the width of the bottom of your graphic. Slip the grommets onto the hooks on each end of the bar, and lock into position by pressing the clip down.

2

Remove the pole from the smaller bag and insert into the hole in the base.

3

Gently direct the arms upward to form a "Y"

6

Adjust the pole height one final time by twisting the locking mechanism on the center pole.
